DETAILED ACTION

Election/Restrictions

1. Claims 1-24 are generic to a plurality of disclosed patentably distinct species comprising cleaning compositions. Applicant is required under 35 U.S.C. 121 to elect a single disclosed composition, as in an example, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Mr. Alan Bornstein on November 3, 2003 a provisional election was made without traverse to prosecute the invention of Example 2 on p. 39, claims 1, 4, 5, 8-13, 18 and 20.

3. The species election requirement is WITHDRAWN, as all of the composition claims are allowable over the prior art of record.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1751

5. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This is a method claim which depends from a composition claim. The examiner suggests that it was supposed to depend from claim 23 (regarding which, see below).

6. Claim 23 provides for the use of a cleansing composition, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 23 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Allowable Subject Matter

7. Claims 1-22 are allowed.

8. The following is an examiner's statement of reasons for allowance: The closest prior art of record is Shana'a, US 5,851,978. This reference discloses lamellar phase cleansing compositions comprising benefit agents with a particle size of 0.015-0.5 mm.

Art Unit: 1751

The reference does not disclose that these benefit agents are or can be gels which possess the agent:gellant ratio recited by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (703) 305-5599. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30.
